## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-26 and 29-32 are drawn to a tuner/receiver which includes a frequency and signal converter both residing on an integrated circuit, classified in class 348 and 455, subclass 731 and 333 respectively.
  - II. Claims 27-28 are drawn to a channel selection method which includes the step of determining a difference between a variable parameter of the selected channel and a predetermined parameter and modifying the command code signal toward reducing the difference (where the specification discloses that the parameter may be the picture frame rate or some other characteristic independent of frequency conversion, classified in class 348, subclass 180 and 731).
2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as reducing the difference between a variable and predetermined parameter of the signal, where the parameter involved independent of frequency conversion, whereas invention I is a tuner/receiver focused on the processing/conversion of the frequency signal (thus dependent upon frequency conversion). See MPEP § 806.05(d).

Art Unit: 2614

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.43).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to BRIAN P. YENKE whose telephone number is (703)305-9871. The examiner can normally be reached on Monday-Thursday 7:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, JOHN W. MILLER can be reached on (703)305-4795. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
